

AT151 Information and Price List

Applications

- Landscaping vehicles
- Mowers—roadside or job site mowing under contract
- Heavy equipment on job site—graders, dozers, dump trucks
- Ambulances
- Wreckers or Tow Trucks
- Municipal trucks including salt spreaders, line painters, etc.

Notes:

- AT151T System—PDA and GPS units vary with power and pricing. We can work with any unit running Palm O/S and standard GPS and can provide program only for customer unit.
- All PC programs run under Microsoft Windows 95 and up.
- Microsoft Access 2000 run time is supplied and will be installed automatically if Access 2000 or above is not

already installed. Some problems with dual installation with Access 97 and before, call us if you have this situation.

- The Access PC program works best with a faster computer. Access was designed for and works best with a single terminal, although up to 5 users can be accommodated. It can be installed at a network location, with some degradation in speed.
- Increased vehicle fleets and users can be accommodated with a newly developed Firebird server based program.

We are presently supplying upgrades over the internet to all programs to existing users. User input is encouraged and welcomed to improve the reports and/or operation. Small handling and shipping fee for upgrade CD, unless the upgrade is to fix our problem.

AT151 Prices
